

# React JS course

**Topic-**

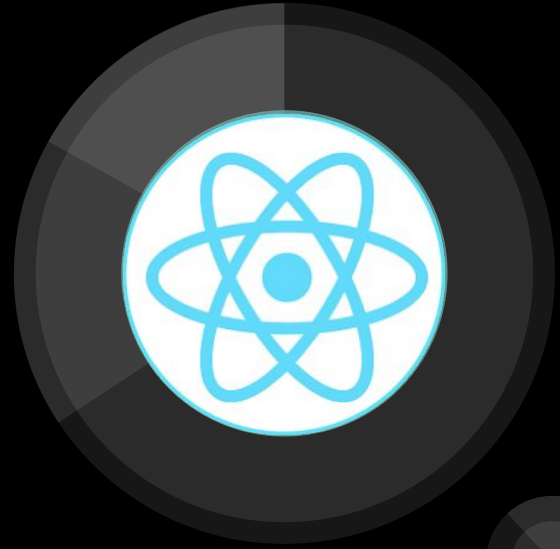

**Introduction to React JS**

Ajay Kumar

# What is React JS?

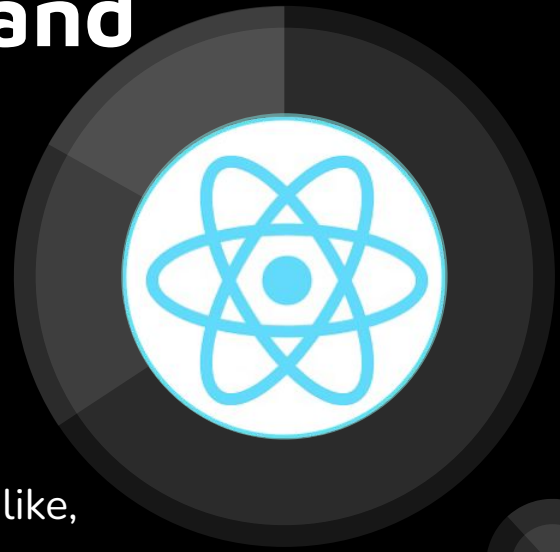

- ❑ Open source Library to create user interface
- ❑ Important - It is not a framework
- ❑ We can build rich user interfaces
- ❑ Large ecosystem
- ❑ Used to create SPA(Single Page Application)

Ajay Kumar

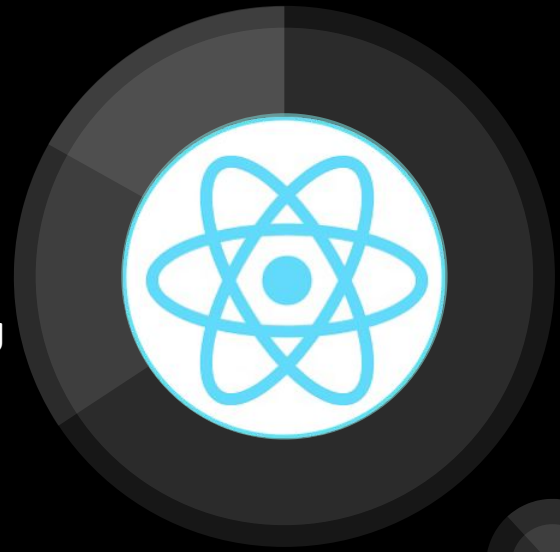

# Why we need to understand React JS?

- ❑ Huge community
- ❑ Created by Facebook
- ❑ In demand skill set
- ❑ Good chance for front end developer job
- ❑ Component based architecture
- ❑ We have to tell React how the UI should be look like, react will build the actual UI
- ❑ React handles re rendering and Updating of components internally
- ❑ DOM is updated very efficiently

# Flexibility in React JS

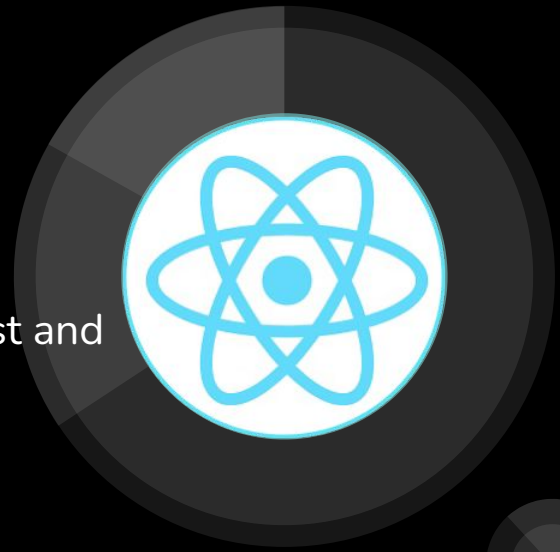

- ❑ Integration can be done in any type of project
- ❑ Either a part or page project can be created using react
- ❑ For mobile apps, use React native

Ajay Kumar

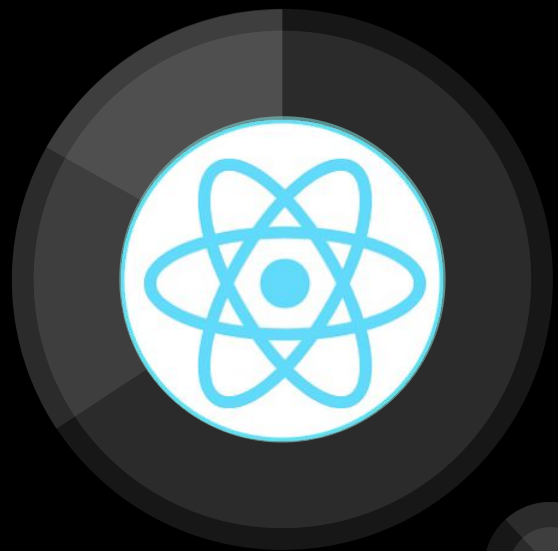

# Tech stack required to learn React JS

- ❑ Basics of HTML, CSS and JavaScript
- ❑ JS ES6 concepts - Arrow function, let & const, rest and spread operators, Object literals etc
- ❑ Array and string methods in JavaScript

# Flow of this course

- ❑ Basics of React js
- ❑ Important interview questions
- ❑ Routing
- ❑ Hooks
- ❑ HTTP
- ❑ Redux
- ❑ And many more...
